PANAMA CANAL TOURS

by Air!

TOUR PACKAGE DESCRIPTION

Seeing the Panama Canal from the air is just as memorable as a Canal transit. The two are, of course, wildly different from their vantage points. Once you are aloft, your perspective immediately changes. The enormity of the project. The wildlife, the aquatic system supporting the Canal's operations, and the history of the area, create a far more memorable experience to last a lifetime. Camera and video shots are unparalleled and we know many hidden areas to shoot.

A one hour tour covers the Pacific and Atlantic sides of the Canal.
